01 — PROGRAM OVERVIEW

The BitwellForge Affiliate Program provides an open, performance-based commercial opportunity for individuals and businesses worldwide.

The model is intentionally straightforward.

Affiliates introduce the Commercial Growth System™ to potential customers through their own networks, audiences, communities, relationships, or distribution channels.

BitwellForge provides:

- The product
- The purchasing infrastructure
- The customer experience
- The digital delivery environment
- Referral attribution
- Commission calculation
- Payout records

The affiliate is responsible for generating legitimate customer demand.

Where a legitimate referral results in an eligible purchase, the affiliate receives the applicable commission.

The objective is not simply to maximise referral volume.

The objective is to create a scalable distribution channel in which genuine customer demand translates into measurable commercial outcomes.

Illustrative Example

A business creator discovers the BitwellForge Affiliate Program and joins.

The creator introduces the Commercial Growth System™ to their audience through their own channels.

A prospect follows the creator's unique referral link and purchases the product.

BitwellForge handles payment, product delivery, customer access, attribution, and commission calculation.

The affiliate generates the referral and receives the applicable commission.

02 — BITWELLFORGE

BitwellForge is a Revenue Infrastructure consultancy working with agencies, consultants, and B2B service businesses to build more structured and predictable commercial growth systems.

Its work focuses on the infrastructure behind sustainable commercial growth, including:

- Commercial strategy
- Client acquisition
- Revenue infrastructure
- Market positioning
- Growth systems
- Operational execution

The Affiliate Program extends access to BitwellForge’s commercial ecosystem through the distribution of its digital product.

Affiliates do not need to deliver the product themselves.

Their role is to introduce the product to potential customers.

Illustrative Example

An independent entrepreneur has no role inside BitwellForge and does not deliver consulting services.

However, they understand the type of commercial problems faced by agencies and consultants.

They introduce the Commercial Growth System™ to people in their network who may find it relevant.

The entrepreneur acts as a distribution partner — not as a BitwellForge consultant or employee.

03 — THE COMMERCIAL GROWTH SYSTEM™

The Commercial Growth System™ is a digital product developed by BitwellForge.

It is designed for professionals and businesses seeking a more structured approach to commercial growth.

The product is delivered digitally through Forge Vault™, BitwellForge’s private customer environment.

Following a successful purchase and access activation, the customer receives access to the applicable product materials through Forge Vault.

The product consists of digital intellectual property and is delivered electronically.

Illustrative Example

A consultant is evaluating different resources to improve the commercial structure of their business.

An affiliate introduces the Commercial Growth System™ and directs the consultant to the BitwellForge website.

The consultant reviews the product, completes the purchase, and receives access through Forge Vault.

The affiliate does not deliver the PDFs, manage the customer's account, or provide product support.

04 — AFFILIATE MODEL

The program operates on a performance-based model.

There is no requirement for affiliates to:

- Purchase inventory
- Store products
- Deliver products
- Manage customer accounts
- Process customer payments
- Provide Forge Vault access

BitwellForge manages the product and customer infrastructure.

The affiliate focuses on distribution.

Affiliates are free to determine where and how they introduce the product, provided their activity remains accurate, lawful, and consistent with the Affiliate Program Terms.

Illustrative Example

An affiliate decides to introduce the product through LinkedIn.

They identify prospects who may find the product relevant, explain the product accurately, and direct interested prospects to their referral link.

The affiliate does not need to process the customer's payment or send the product.

BitwellForge handles the transaction and delivery.

05 — HOW THE PROGRAM WORKS

The operating model consists of five stages.

01 — JOIN

Create an affiliate account.

02 — VERIFY

Complete email verification.

03 — RECEIVE

The platform automatically provides a unique referral link.

04 — INTRODUCE

Use the referral link when promoting or recommending the Commercial Growth System™.

05 — EARN

When an eligible purchase is successfully completed and verified, the applicable commission is recorded.

The process is designed to minimise manual administration for both the affiliate and BitwellForge.

Illustrative Example

Sarah creates an affiliate account.

She verifies her email address.

The platform generates:

bitwellforge.com/?ref=SARAH42

Sarah shares that link with a potential customer.

The customer purchases the Commercial Growth System™.

The platform verifies the transaction and records Sarah's \$50 commission.

06 — REFERRAL ATTRIBUTION

Each affiliate receives a unique referral identifier.

The corresponding referral link may appear in a format such as:

bitwellforge.com/?ref=YOURID

When a prospective customer enters the BitwellForge environment through the referral link, the platform records the applicable attribution.

The intended journey is:

Referral → Product → Checkout → Authentication → Purchase → Commission

The attribution system is designed to preserve the relevant referral relationship throughout the customer journey.

Affiliates are not required to manually report individual sales.

Illustrative Example

James shares:

bitwellforge.com/?ref=JAMES17

A prospect clicks the link, reviews the product, creates an account, and completes payment later in the same customer journey.

The platform retains the applicable referral attribution and associates the eligible purchase with James.

James does not need to submit a screenshot, receipt, or manual commission claim.

07 — COMMISSION STRUCTURE

The program uses a fixed commission model.

\$50 USD PER ELIGIBLE SALE

For every eligible and successfully verified purchase attributed to an affiliate:

Commission = \$50 USD

The commission is fixed rather than percentage-based.

Commission calculations are performed by the BitwellForge platform.

Affiliates cannot manually modify commission amounts.

Illustrative Example

An affiliate generates:

1 eligible sale → \$50 commission

10 eligible sales → \$500 commission

25 eligible sales → \$1,250 commission

The calculation is based on the number of eligible sales, not on a percentage selected by the affiliate.

08 — ELIGIBLE SALES

A commission becomes eligible when the underlying transaction satisfies the program requirements.

This includes:

- A valid customer purchase
- Successful payment verification
- Valid affiliate attribution
- No duplicate commission
- No self-referral
- No fraudulent or manipulated transaction

Each eligible order can generate a maximum of one affiliate commission.

Repeated payment notifications or technical webhook retries do not create additional commissions.

Illustrative Example

An affiliate generates a legitimate customer purchase.

The payment is successfully verified.

The referral attribution is valid.

No duplicate commission exists.

The transaction therefore generates:

1 eligible sale → \$50 commission

If the payment system sends the same confirmation more than once because of a technical retry, the system does not create another \$50 commission.

09 — PAYOUT FRAMEWORK

BitwellForge operates a defined monthly payout cycle.

PAYOUT WINDOW

2nd–7th OF EACH MONTH

Eligible commissions generated during the preceding calendar month are processed during the applicable payout window.

Example:

January eligible commissions → February 2–7 payout window

February eligible commissions → March 2–7 payout window

The payout schedule applies regardless of the number of eligible sales generated.

Illustrative Example

An affiliate generates 20 eligible sales during January.

$20 \times \$50 = \text{\$1,000}$

The \$1,000 is included in the applicable February payout cycle.

The affiliate does not receive 20 separate payments.

The commissions are processed through the defined monthly payout window of February 2–7.

10 — AFFILIATE ACCOUNT & DASHBOARD

Each affiliate receives a private account environment.

The dashboard may provide visibility into:

- Affiliate name
- Referral link
- Referral activity
- Eligible sales
- Total commissions

- Pending commissions
- Paid commissions
- Current payout period
- Payout history

The dashboard is account-specific.

An affiliate cannot access another affiliate's information.

Illustrative Example

David logs into his Affiliate Dashboard.

He sees:

Referral Link:

bitwellforge.com/?ref=DAVID81

Eligible Sales:

12

Total Commission:

\$600

Paid Commission:

\$400

Pending Commission:

\$200

He cannot see another affiliate's sales, commission, or payout information.

11 — PAYOUT INFORMATION

Affiliates may provide payout information through the secure Payout Settings section.

The initial payout information may include:

- PayPal email
- Country
- Recipient name

Affiliates are responsible for maintaining accurate information.

Incorrect or incomplete recipient information may delay a payout.

BitwellForge may introduce additional payout methods in the future.

Affiliates are never required to provide BitwellForge's internal payment credentials.

Illustrative Example

Maria enters:

Country: United States

Recipient Name: Maria Anderson

PayPal Email: maria@example.com

This information is used for Maria's applicable payout processing.

Maria does **not** provide BitwellForge with:

- PayPal Client ID
- PayPal Client Secret
- NOWPayments API key
- Supabase credentials

Those credentials remain internal to BitwellForge.

12 — PAYOUT PROCESS

The underlying commission records are maintained automatically.

The process is:

Eligible transaction

↓

Commission recorded

↓

Previous calendar month closes

↓

Payout batch generated

↓

Payout processing

↓

Payment confirmed

↓

Payout recorded

The exact payout mechanism may depend on the payment infrastructure available to BitwellForge.

A payout is recorded as **PAID** only after the applicable payment has actually been completed.

Illustrative Example

During January, an affiliate earns \$750 across 15 eligible sales.

At the beginning of the February payout cycle:

January commissions → \$750 payable

The payout batch records:

Affiliate: Alex

Sales: 15

Commission: \$750

Status: PENDING

Once payment is actually completed, the status becomes:

PAID

13 — PROMOTIONAL RESPONSIBILITY

The Affiliate Program is structured around independent distribution.

Affiliates determine:

- Their audience
- Their channels
- Their messaging
- Their content format
- Their promotional frequency
- Their approach to customer acquisition

BitwellForge does not prescribe a specific marketing channel.

The affiliate is responsible for creating the commercial introduction.

The objective is to generate genuine customer interest rather than simply maximise impressions or traffic.

Illustrative Example

An affiliate has an audience of business owners.

Rather than promoting the product to everyone indiscriminately, the affiliate identifies people who are likely to benefit from the Commercial Growth System™.

They introduce the product through their preferred channel and direct interested prospects to their referral link.

The affiliate owns the distribution strategy.

BitwellForge owns the product and customer experience.

14 — COMMUNICATION STANDARDS

Affiliate communication should be:

- Accurate
- Professional
- Relevant
- Transparent
- Non-misleading

Affiliates should represent the product based on its actual positioning and capabilities.

Do not guarantee:

- Revenue
- Sales
- Clients
- Business growth
- Investment returns
- Specific financial outcomes

The value proposition should be communicated without creating expectations that BitwellForge has not established.

Illustrative Example

Instead of saying:

“Buy this system and you will generate \$10,000 next month.”

An affiliate should communicate the product more accurately:

“The Commercial Growth System™ provides a structured framework for businesses looking to strengthen their commercial growth infrastructure.”

The second approach accurately communicates the product without making an unsupported financial promise.

15 — PROHIBITED PRACTICES

The following activities are prohibited:

- Spam
- Fraudulent traffic
- Misleading advertising
- False product claims
- Fabricated testimonials
- Fake scarcity
- Fake discounts
- Misrepresentation of BitwellForge
- Brand impersonation
- Phishing
- Manipulated transactions
- Self-referrals
- Artificial accounts
- Referral manipulation
- Unauthorised use of BitwellForge credentials

Affiliates must not use deceptive methods to generate commissions.

Illustrative Example

An affiliate creates 20 fake accounts and purchases the product through their own referral links to generate \$1,000 in artificial commissions.

This is prohibited.

By contrast, an affiliate introducing the product to 20 genuine independent prospects is operating within the intended model.

16 — SELF-REFERRALS

The program is designed to reward genuine customer acquisition.

Affiliates may not generate commissions through purchases made by themselves or through arrangements primarily designed to create an affiliate commission without a genuine independent customer relationship.

This includes:

- Personal purchases
- Artificial accounts
- Friends or associates acting solely as intermediaries
- Manipulated referral attribution
- Duplicate identities
- Artificial transaction structures

Illustrative Example

An affiliate asks a friend to create an account solely so the affiliate can purchase the product through their own referral link and receive \$50.

That transaction does not represent genuine customer acquisition and is therefore not eligible for commission.

17 — BRAND REPRESENTATION

Participation in the Affiliate Program does not create ownership or representation rights over the BitwellForge brand.

Affiliates may accurately reference:

BitwellForge

Commercial Growth System™

BitwellForge Affiliate Program

Affiliates may not:

- Impersonate BitwellForge
- Present themselves as BitwellForge employees
- Make unauthorised corporate statements
- Create misleading BitwellForge identities
- Register confusingly similar domains
- Misrepresent their relationship with BitwellForge

Illustrative Example

An affiliate may write:

“I participate in the BitwellForge Affiliate Program and recommend the Commercial Growth System™.”

The affiliate may not write:

“I am an official BitwellForge consultant.”

unless BitwellForge has expressly authorised that representation.

18 — DIGITAL PRODUCT POLICY

The Commercial Growth System™ is a digital product delivered through Forge Vault™.

The product consists of digital intellectual property and is delivered electronically.

The applicable purchase and access policy is presented to customers during checkout.

Affiliates must communicate the policy accurately.

Affiliates must not independently promise:

- Refunds
- Credits
- Guarantees
- Discounts
- Commercial terms

that differ from BitwellForge’s published terms.

Illustrative Example

A prospect asks an affiliate:

“Can I receive a refund after accessing the product?”

The affiliate should direct the prospect to BitwellForge’s published purchase policy rather than promising a refund independently.

The affiliate’s role is to explain the product — not create separate commercial terms.

19 — ACCOUNT SECURITY

Affiliates are responsible for protecting their accounts.

Credentials must remain confidential.

This includes:

- Passwords
- Verification codes
- Recovery information
- Session information

BitwellForge will never require an affiliate to provide internal BitwellForge credentials.

Internal credentials include:

- PayPal Client ID
- PayPal Client Secret
- NOWPayments API key
- Supabase credentials
- Webhook secrets

Illustrative Example

An individual claiming to be a BitwellForge representative asks an affiliate to provide their PayPal Client Secret.

The affiliate should not provide it.

Affiliate access requires only the information necessary for the affiliate's own account and payout configuration.

20 — ACCOUNT GOVERNANCE

BitwellForge may review affiliate activity where necessary to maintain the integrity of the program.

An account may be suspended or terminated in cases involving:

- Fraud
- Abuse
- Misrepresentation
- Spam
- Brand misuse
- Self-referral
- Manipulation
- Prohibited promotional activity
- Unauthorised access
- Material violation of program terms

Illustrative Example

An affiliate consistently generates legitimate referrals through their normal audience.

There is no evidence of fraud or prohibited activity.

Their account continues operating normally.

If another affiliate is found to be generating artificial transactions and manipulating referrals, BitwellForge may restrict or terminate that account.

21 — COMMISSION INTEGRITY

The affiliate infrastructure is designed to maintain accurate referral and commission records.

The system incorporates controls intended to prevent:

- Duplicate commissions
- Duplicate payment events
- Referral manipulation
- Self-referrals
- Unauthorised commission changes
- Duplicate payout records

The commission records maintained by the BitwellForge platform constitute the operational record for the program.

Illustrative Example

A customer completes one purchase.

The payment provider sends the same successful payment notification three times because of a technical retry.

The system recognises the transaction as the same underlying order.

Result:

1 customer
1 order
1 commission
\$50

Not:

3 commissions
\$150

22 — INTERNATIONAL PARTICIPATION

The Affiliate Program is available internationally.

There are no restrictions based solely on:

- Profession
- Industry
- Audience size
- Geography

Affiliates remain responsible for complying with applicable laws, advertising requirements, disclosure requirements, tax obligations, and other regulations relevant to their activities.

BitwellForge does not provide individual legal, tax, or financial advice.

Illustrative Example

An affiliate based in India, another based in the United States, and another based in the United Kingdom may all participate in the same program.

Each operates under the same:

\$50 commission structure

and

2nd–7th monthly payout window.

Each affiliate remains responsible for their own local compliance obligations.

23 — AFFILIATE RESPONSIBILITIES

Affiliates participating in the program are expected to:

- Generate legitimate referrals
- Communicate accurately
- Maintain professional promotional standards
- Protect account credentials
- Maintain accurate payout information
- Follow applicable laws
- Respect the BitwellForge brand

- Avoid misleading claims
- Avoid prohibited promotional practices
- Use the assigned referral infrastructure appropriately

Illustrative Example

An affiliate consistently introduces relevant prospects, uses accurate product descriptions, maintains secure account information, keeps payout details current, and avoids misleading advertising.

This represents the intended operating standard for the program.

24 — FREQUENTLY ASKED QUESTIONS

What is the commission?

The commission is **\$50 USD per eligible sale**.

Is the commission percentage-based?

No.

The commission is fixed at **\$50 USD per eligible sale**.

When are commissions paid?

Eligible commissions from the previous calendar month are processed during the **2nd–7th monthly payout window**.

Do I need to submit sales manually?

No.

Referral attribution and eligible purchases are tracked through the BitwellForge platform.

Will I receive a unique referral link?

Yes.

Each affiliate receives a unique referral identifier and corresponding referral link.

Can I participate from outside India?

Yes.

The program is available internationally.

Is there a minimum audience size?

No.

There is no minimum audience size requirement.

Does my profession matter?

No.

The program is open regardless of profession or industry, provided promotional activity follows the program terms.

Where can I see my commissions?

Through your private Affiliate Dashboard.

Can I update my payout information?

Yes.

Payout information can be managed through the secure Payout Settings area.

Can I refer myself?

No.

Self-referrals are not eligible.

Is there a fee to become an affiliate?

No affiliate participation fee is required unless BitwellForge expressly states otherwise.

Am I a BitwellForge employee?

No.

Affiliates operate independently and are not employees, agents, or authorised representatives of BitwellForge.

Illustrative Example

A new affiliate joins from outside India, has no large audience, and works in an unrelated profession.

They are still able to participate.

They create their account, verify their email, receive their referral link, and begin introducing the product to relevant prospects.

If those referrals generate legitimate eligible sales, the affiliate earns the applicable **\$50 commission per sale**.

25 — PROGRAM PRINCIPLES

The BitwellForge Affiliate Program is built around a straightforward commercial model.

BitwellForge provides:

THE PRODUCT

THE PLATFORM

THE CUSTOMER EXPERIENCE

THE ATTRIBUTION INFRASTRUCTURE

The affiliate provides:

THE DISTRIBUTION

THE AUDIENCE

THE COMMERCIAL INTRODUCTION

The objective is not volume for its own sake.

The objective is relevant distribution.

The strongest affiliate relationships are built when the right product reaches the right audience through a credible introduction.

The operating principle is therefore:

RELEVANT AUDIENCE.

GENUINE VALUE.

QUALIFIED DEMAND.

MEASURED COMMERCIAL OUTCOME.

Illustrative Example

An affiliate identifies 100 potential prospects.

Rather than generating artificial clicks or misleading those prospects, the affiliate focuses on the people most likely to find the Commercial Growth System™ relevant.

Ten prospects purchase legitimately.

The affiliate generates:

10 eligible sales × \$50 = \$500 commission

The outcome is measurable, attributable, and aligned with the purpose of the program.

BITWELLFORGE

The business of better.
